

Ye Yint Thu

+61493946506

waltereyint@gmail.com

OVERVIEW

- A Software Engineer with 3+ years of professional engineering and recent Master of AI (UTS, Dean's List), AWS ML Engineer Associate certified, with shipped AI infrastructure substance
- Software Engineer at Qibitech, 485 Graduate Visa with full work rights
- **LinkedIn:** <https://www.linkedin.com/in/walter-yang-9a97b7149/>
- **Github:** <https://github.com/WalterYeYint>
- **Portfolio:** <https://waltereyint.github.io/>

WORK HISTORY

Software Engineer **March 2022 - Present**
Qibitech Inc

- Develop, test, and maintain multithreaded/asynchronous control systems for warehouse robots and robot arms using C++, Python, ROS & Docker. Collaborate in an Agile environment using Jira + Bitbucket
- Implement and debug features for autonomous systems, including TCP/UDP communication, logging and pathfinding algorithms for robot control/fleet management systems, Bluetooth & Serial communication for robot arm prototype. Maintain high-quality code

Freelance Software Engineer **October 2021 - January 2022**
Upwork Platform

- Developed two computer-vision systems for detecting defects on white papers and Logos

Junior Machine Learning Engineer Intern **July 2021 - September 2021**
Omdena

- Took part in two-month project for developing object detection for symbols, lines and recognize texts in piping and instrumentation diagrams

RELEVANT EXPERIENCE

NimbusQuant: Multi-Agent Stock Analyzer **July 2025 - November 2025**
University of Technology Sydney (UTS)

- Developed a LangChain/Langgraph-based project for analyzing, evaluating and recommending company stock using multiple AI agents with tools and Retrieval Augmented Generation (RAG) database
- Implemented tool-using agents (including Sentiment, Fundamental, and Valuation) to process financial reports and news, Flask backend & ReactJS frontend
- Deployed to AWS (ECS Express Mode + Fargate + CloudFront) via Github Actions CI/CD

SonicJob: AI-Powered Job Employment Platform **March 2025 - May 2025**
University of Technology Sydney (UTS)

- Created a streamlit & flask web-app for job/candidate recommendation based on uploaded resumes/job descriptions (Selected for UTS AI Showcase, 2025)
- Trained an LLM (Roberta) using MLOps pipeline and CI/CD workflow, achieving F1 score of 0.81

PPE detection using YOLOv8 **December 2024 - January 2025**
Personal Project

- Created a PPE detector model to detect 10 different personal protective equipments such as hardhat mask and safety vest with YOLOv8 and hosted on streamlit platform with different configurations

Analyzing AUS Open Tennis Dataset & housing data of NSW **August 2024 - November 2024**
University of Technology Sydney (UTS)

- Analyzed and visualized housing data of Penshurst, New South Wales with Microsoft Excel, providing insights into housing properties for current & potential investors
- Analyzed 120 years of Australian Open tennis data with different Tableau visualizations for key insights

MI-EEG classifier using IFB and CNN

March 2024 - June 2024

University of Technology Sydney (UTS)

- Led the team in a project to design a motor imagery EEG classifier with Interpretable Filter Bank and Convolutional Neural Network, reaching accuracy of 82.76%

Online food ordering web-app with recommendation system

February 2022 - November 2022

University of Greenwich

- Created an online food ordering web-app prototype with flask and KNN algorithm for recommendation

Lane Following Vehicle Prototype with Traffic Sign Detection

December 2019 - February 2021

Yangon Technological University

- Designed an autonomous vehicle prototype using OpenCV and PID controllers for lane-following, integrating sensors and control hardware (Raspberry Pi & Arduino).
- Used TensorFlow (SSD-MobileNet-V2 model) for real-time traffic sign detection and speed adjustment.

EDUCATION

Master of Artificial Intelligence

November 2025

University of Technology Sydney (UTS)

- Received Post Graduate Academic Excellence Scholarship
- Included in the Dean's List 2025 for outstanding academic achievement
- GPA: 6.69/7

B.Sc (Computing) (Honours) (First Class)

February 2023

University of Greenwich

- Achieved First Class Honours

CERTIFICATES

AWS Certified Machine Learning Engineer – Associate

September 2025 - Present

Amazon Web Services Training and Certification

Production Machine Learning Systems

June 2024

Google Cloud Skills Boost

Deep Learning Specialization

September 2019 - August 2020

deeplearning.ai

SKILLS

- Programming: Python, C++, PHP, Javascript/React
- AI/ML: Tensorflow, Pytorch, OpenCV, Scikit-learn, pandas, transformers, huggingface, RAG, MCP, ClearML, LangChain, LangGraph, Anthropic, OpenAI, Ollama, Langflow
- Backend & Cloud: Django, Flask, FastAPI, Streamlit, GCP, AWS, Docker, Linux, CI/CD
- Database: MySQL, Sqlite3, Chroma, PostgreSQL (+pgvector)
- Communication Protocols: REST API, gRPC, WebSocket, Socket.io, HTTP/HTTPS, UDP/TCP

ADDITIONAL INFORMATION

Volunteered as Team Coordinator for scheduling, provisions & guidance - Myanmar STEM Competition 2018

English Language Proficiency (PTE) - 90 (Overall)

Japanese Language Proficiency (JLPT) - N2 passed

Work Rights: 485 Graduate Visa with full work rights
